

~~① Analysis~~

① Joan Faunce's synopsis, in her own handwriting, of discrepancies/ errors/alterations done by Mary Jane Burton in case # 76-9468

Evidence submitted w/ request to check for human blood --
(MJB apparently skipped testing to rule out non-human origin;

Evidence resubmitted six months later w/ request to identify animal blood --
MJB wrote "new report" w/ different result, ~~to~~ but there is no evidence of further testing on which to base any new report.) "Deer Case"

② Joan Faunce's handwritten synopsis of Examiner Mary Jane Burton's case # 76-23383.

(MJB reported bloodstains on suspect's pants were consistent w/ victim's blood, but MJB's testing showed they were ~~in~~ consistent w/ the suspect's blood.)

Report on Item 2?

76-9468

Item 2

- Request of 11-17-76 says "check samples (Item 2) to see if human blood"

Notes: Item 2: indicated that the item consisted of white towel containing corn husks & stalks, soil & diaper bloodstains in bucket w wicks

Worksheet (11-17-76): Item 2 indicate human blood ^{type B} CD₂e

Some indication of A.
No worksheet for precipitin tests to determine species origin. No indication of having run blood against anti-deer.

→ Report 11-29-76: Item 2 Human blood B CD₂e

Request 5-24-77 Rec'd

"Towel containing cornstalks & husks & soil"

Examinations requested: "Blood (animal mixed with human?)"

→ Report 5-31-77

"Tests indicate the presence of blood from a member of the deer family"

Notes: + deer
+ ruminant } No precipitin worksheet or evidence of adequate testing

→ This is obviously a resubmission of Item 2
Reports are conflicting

76-23383

#3 Sample of blood from Suspect [redacted]
Type A CDcē EAP-A EsD1 Hp2-1

#5 Sample of blood from Victim [redacted]
Type O cē EAP-B EsD-1 Hp2-1

[redacted] Conflict in EAP log book

#2 Suspect's jeans
report - "EAP-B EsD-1 Hp2-1. It
was not possible to determine the
type in the ABO system."

Worksheet jeans & control were
Type A

Rh was done, not reported

Rh appears to be CDcē though
write-up ^{on wrong subject} totally confusing

Note Blood Type A CDcē (not reported
is consistent with that of the
suspect not with that of the
Victim as the reported results
would indicate
